

GP5500E-DF

Gorilla Power® 5500W
Dual-Fuel Generator

KEY FEATURES

DUAL FUEL

Runs on petrol or propane for greater flexibility, extended runtime, and improved efficiency in use.

ELECTRIC/REMOTE START

Effortlessly start your generator from a distance, adding convenience and ease of use every time.

LOW OIL SHUT OFF

Protects the engine by automatically shutting off when oil levels are too low.

TECHNICAL SPECIFICATION

Model	GP5500E-DF
Maximum Watts	5500w
Running Watts	5000w
Fuel Type	Petrol/Propane Gas
Weight (kg)	91kg
Fuel Tank Capacity (litres)	25L
Oil Capacity (litres)	1.1L
Starting System	Recoil/Electric/ Wireless Remote
Frequency (hertz)	50Hz
Dimensions (mm)	710*465*485mm

PANEL CONNECTIONS

GROUND TERMINAL

Provides a secure earth connection for improved safety and compliance with regulations and guidelines.

240V 32A SOCKET

Designed for heavy-duty applications, offering increased power capacity for demanding equipment and tools.

2 x 120V 32A SOCKETS

Designed for heavy-duty industrial applications, this socket provides lower voltage for compliance with building site regulations and safety standards.

† Please ensure the correct model is referenced when reviewing technical specifications, as features & performance may vary between models.
